REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 27 THE REDCLIFF REVIEW THURSDAY MAR. 16th. 1939 Number 38

Town Council Meeting Held on Monday Evening

Several Citizens at the Meeting Applied For Property

The Town Council met on Monday evening as usual with Mayor Sangster and all councillors present.

Several citizens were present for the purpose of making arrangements to purchase certain Town properties.

Mr. H. Dacre applied for an agreement to have his building moved to some other part of the town. Council agreed that the building might be moved provided that the change would be made early in June.

Mr. Kaldestad applied for the purchase of a house for $200.00. Council decided that the price should be $220.00 and an agreement was made to this effect.

Mr. Mc.Glinchey applied for the purchase of a house on First St. and Council agreed to the purchase at $75.00.

Mr. J. Baldry applied for a building in the East end of Town. Council decided to investigate before selling the building.

Several citizens applied for the payment of their hospital accounts but Council did not agree.

The local Greenhouse Company requested that improvements be made in the roads in districts both west and south leading to their greenhouses.

Accounts of the finance committee were moved for payment and all were approved.

Council is trying to make some arrangements whereby Their Majesties may be seen at Redcliff on May 26th. next.

W. H. Nussey has agreed to purchase a building in the south end of Town.

Council has also made arrangements for the use of the Broadway Store for the Swimming Pool Carnival next month.

Regarding the use of Treasury Branch vouchers, the finance committee reported they would approve the acceptance of Clearing House cheques, but not the acceptance of non- negotiable vouchers.

Parochial Girls Guild Entertained Tuesday

Cards, Program and Dance Much Enjoyed

The Parochial Girls' Guild of St. Ambrose Church were the hostesses at an enjoyable card party in the Parish Hall on Tuesday evening.

There was a good crowd who participated in playing whist and later enjoyed a short program and dance.

The prize winners included Mrs. Jas. Dutton and Mrs. Ken. McKay who won the Ladies' first and Gents' first respectively. Miss Rose Kuffman took the Ladies' consolation while Mr. Nelson Bell carried off a similar honor for the Gentlemen.

The program consisted of solos by Miss May Martin and Mr. P. Huckle, a tap dance by Miss P. Shaw and a musical monologue by Miss Joan White of Medicine Hat.

Mrs. Wm. Pearson supplied the music for the dance.

Refreshments were served and another enjoyable evening chalked up to the credit of the Parochial Girls' Guild.

OBSERVER'S OBSERVATION

Why Did They Do It?

We have been wondering ever since the night of the Legion Banquet, why so many left the banquetting hall before the conclusion of the program.

To say the least such an exodus was anything but complimentary to those who were still to take part in he program and it certainly showed a great lack of consideration for their hosts the Legionaires, who had been so gracious as to invite them to a complimentary banquet.

It would have been kinder and in better taste had the invitations been returned rather than that so many should have withdrawn practically after having partaken of the "Loaves and Fishes".

After all, every guest owes something in consideration and appreciation to his hosts whether he cares for the kind of entertainment provided or not.

—x—

Dont Forget the Big Carnival Soon

KEEP IN MIND THE BIG TWO DAY CARNIVAL to be held in THE BROADWAY STORE on APRIL 21 and 22. The PROCEEDS will be used to further improve REDCLIFF'S NEW PARK. Come with the crowd and help a WORTHY CAUSE.

—x—

According to reports considerable snow has fallen in this district both north and west and farmers are having a hard time getting to town for supplies and to keep appointments.

* * *

If every farmer would sow a few bushels of the best seed obtainable of a recommended variety on a few acres of summerfallowed land it is certain that the average quality of Canadian wheat for export would be improved, foreign sales would be better assured, our surplus would decline and prices would rise, and all would benefit. So says H. G. L. Strange, well known authority on wheat.

Redcliff Old Timer Passed Away Tuesday

Was Farmer in This District For Many Years

Mr. Malcolm Sodderholm who lived in this district for a number of years passed away last Tuesday

Deceased was a farmer living a few miles west of town but a few years ago he gave up his farming operations and moved to Redcliff where he has lived ever since.

For several years past Mr. Sodderholm has suffered from rheumatism and recently was taken to the Medicine Hat hospital for treatment. He passed away on Tuesday.

Funeral services for the late Mr. Sodderholm will be held on Friday afternoon at 2 o'clock from St.Ambrse Church. Rev. H. S. Hamnett will officiate.

Interment will be made in the Redcliff Cemetery.

Legion Banquet Friday Evening Great Success

Banquet — Program And Dance Much Enjoyed

The Legion Banquet and social held on Friday evening in Cliff Hall was a decided success.

About 175 guests sat down to a most sumptuous and delectable repast to which they did full justice.

The tables looked lovely with their vases of flowers and spotless linen. The fruit cups at every place with the ruddy jellies the green salads and all the rest filled and satisfied the artistic eye, and later, with accompanying turkey and all its trimmings, filled and more than satisfied the less artistic stomach.

The viands from fruit cup all through the courses to pie a la mode, which had been provided and served by the ladies of St. Mary's Altar Society were all one could desire.

Promptly at the time appointed Mr. B. Allison, president of the Legion who acted as Toast Master and carried out his duties in a most efficient manner,— briefly and effectively, as he ever does called for a one-minute silence in memory of those comrades who did not return, at the conclusion of which Mr. Allison recited those touching words. "They shall not grow old, as we that are left grow old. Time can not wary them nor the years condemn. In the morning and at the going down of the sun, We shall remember them."

In the Toastmaster's brief remarks he asked for an increase in the membership of both the Legion and the Ladies' Auxiliary

During the banquet, Mr. H. Turner, and his orchestra delighted the audience whith several fine selections.

A lengthy program consisting of several toasts and musical selections then followed.

The Toast To Canada was proposed by Mr. P. Lavelle. In it he made a plea for unity throughout Canada and the Empire, stressing the fact that only through unity can those things which democracies hold - most dear, be preserved.

Mr. W. King in a neat speech replete with humor and pathos responded to this toast.

Mr. J. R. Mackenzie proposed the Toast to our Town. In doing so Mr. Mackenzie traced the history of Redcliff from its inception to the present time and stressed the fact that in spite of the high winds and the several depressions it had weathered, Redcliff would survive so long as the people retained that spirit of persistence which they have shown in the past and he predicted that Redcliff would still fulfill the dreams of those dreamers — its founders.

Mayor Sangster responded to this toast. He cited some of the difficulties of the council, commended Mr. P. Lavelle for his stabilizing influence on the early councils, and eulogized the Legion Members as being good fellows.

The Toast to the Canadian Legion which was to have been proposed by Rev. H. S. Hamnett who was absent, was read by Mr. A. E. Shaw. Mr. Harry Johnson responded to this toast, giving an account of the organization, it's aims and objects and the work it has accomplished on behalf of the returned men and their families.

The Toast to the Ladies' Auxiliary was proposed by Mrs. E. L. Stone, and responded to by Mrs. J. Kitchen. Mrs. Kitchen in responding to this toast drew the attention of the audience to the Honor flag which hung at the front of the hall and explained the significance of its numerous stars.

Among the musical numbers rendered were solos by Miss Kane Miss May Martin, Mrs. T. Balmer Mr. J. Davies and Mr. W. Swanson; duets by Mrs. J. Hope and Miss Ellen Hope, Mr. and Mrs. Bernard Thacker and Mrs. E. Podesta and Mr. J. Davies; a quartette by Mesdames Sheasby and Thacker, and Messrs. J. Hitchen and B. Thacker, and selections by the orchestra.

Immediately upon the conclusion of the program, the floor was cleared for dancing, which which was thoroughly enjoyed for several hours.

Altogather it was one of the most enjoyable evenings spent by Redcliff folk in a long time.

Mr. Nussey Recalls An Interesting Sign

Young ladys and gentlemen larnes their grammur and langeudge in the purtiest manner, also grate care taken off their morrels and spellin.

Also zarn zinging, taycher the bass vial and all other zorts of fancy work, squadrils, pokers, weazels and old counntry dances tort at home and abroad at perfekshun.

Perfumery and snuff in all its branches.

As times is cruel bad I beg to tell oo that I have just beginned to sell all sorts of stashonary ware, cox, hens, vouls, pigs and all other kinds of poultry, blackin brishes, herrins, coles. scrubbin brishes, traykel and godly bukes, and bibles, mise traps, brick dust, wisker seed, morrel pokerankerchers and all zorts of swatemaits including taters, saussages and other garden stuff, bakky, zegars lamp oyle, tay kittles and other hintoxzikation likkers, a dale of fruit, hats, zongs, hare oyle pattins, bukkits, grindin stones and other aitables, korn and bun-yon zalve and all ardware.

I has laid in a large azortment of trype, dogs -mate, lolipops, ginger beer, matches and other pikkles, such as hepsom salts, hoy sters, Winzer soap, anzetra.

Old rags bort and sold ere and nowhere else, newlayde heggs by me Roger Giles; zinging burds, keeper such has howles, donkies, paykox, lobsters, crikets, also a stock of a celebrated brayder.

I tayches gography, rithmetic, cowsticks, jimnasticks and other chynees tricks.

Midget Hockey Finals Attract Redcliff Fans

Blue Bombers Putting Up Fine Brand of Hockey

Two very interesting hockey games between Medicine Hat and Edmonton teams were played this week in Medicine Hat. In the game played on Tuesday night Medicine Hat won with a score of 3 to 1 and in last night's game Edmonton won 2 to 1. The third game will decide the champion in the Alberta Midget Series.

Most of the boys on both teams are still attending school but they are putting up a fine brand of hockey and are attracting a large tendance of enthusiasts.

Redcliff fans have attended all Midget hockey games held in Medicine Hat this winter and judging from the remarks heard after each game they are certainly getting their money's worth.

Science And Agriculture

Perhaps never in the history of Western Canada has what is currently designated the agricultural problem received so much attention as it is doing at the present time, but the problem of enabling the farmer to reap a margin of profit on his operations, or even sufficient to cover the cost of production and marketing has not yet been solved.

To a greater or less degree the problem is one that is vexing the whole world, for the agricultural industry is in the doldrums in almost every country on the globe, but due to the character of the industry in Western Canada where the farmer must sell his major product in a highly competitive market and buy the implements of production and necessities of life in a protected industrial sphere the problem is more acute here than anywhere and this differential has been accentuated in recent years by the vagaries of climatic conditions.

It is not, therefore, surprising to find that the question is uppermost in the minds of all men in the west; that it is receiving forceful attention whenever and wherever men congregate in convention; that the question is being ventilated with greater frequency than any other in the legislative assemblies of the country; that discussion on it and many phases of it occupies much space in the newspapers, farm magazines and other publications and that it is the subject of inquiry by innumerable organizations and commissions.

With all this discussion going on, on a subject which everyone recognizes as the most vital one in Western Canadian history, it seems a reasonable assumption that if there is a solution, and there must be one if this country is to prosper and have an assured future, it will be found.

As has been suggested before, innumerable proposals have been made as a solution to this great problem. They include among others; international agreements between the great wheat producing countries, national action in the form of subsidization of the agricultural industry by the country as a whole, a method which is now being given a trial with as yet undetermined results; the discovery of new markets; the expansion of existing markets; the stimulation of the home market in the direction of increased consumption; greater diversification of agricultural practice; the conversion of agricultural production to industrial use.

* * * *

In Several Directions

Whole volumes might be written on all these proposals, all of which have some merits and some defects, but space and time forbid. All of these and other plans for the rehabilitation of western agriculture are being heard by the group headed by Premier Bracken of Manitoba which is now making a comprehensive survey of the whole question in the hope of finding the answer to the riddle.

As has also been suggested before, however, it is probable that the ultimate solution of this engrossing problem does not lie wholly in any one of these orbits, but most likely in a combination of many or all of them, and there are some indications that readjustment is actually taking place, painful and lengthy though the process may be.

It has undoubtedly occurred to many who have given serious thought and study to this problem that at least a partial and a happy solution might be found in some course which would result in a closer relationship between agriculture and the manufacturing industries, for to the extent which these two branches of industrial life can be made dependent upon one another, to that extent will both be benefitted and the solution of the problems of both be closer to solution.

* * * *

A Closer Tie-Up

That already something is being done along these lines as the result of research work and the practical application of laboratory findings, was indicated in a recent contribution in the House of Commons by W. G. Weir, Liberal member for MacDonald, who described some of the things science is doing to bring industry and agriculture together in the United States, when he pointed out that Henry Ford is using in his factories annually 60,000,000 pounds of cotton, 400,000 bushels of corn, 2,300,000 gallons of molasses, 3,200,000 pounds of wool 1,300,000 square feet of lumber, 350,000 pounds of mohair and an unlimited supply of soya beans.

Mr. MacDonald stated that three products have been developed from oats and are being sold in the United States—a fine oat flour with peculiar preserving qualities, a pleasing perfume which is competing annually for a share of the $200,000,000 spent yearly in the U.S. for cosmetics, and furfural, which when mixed with a bituminous binder and dirt, is being used to make satisfactory market roads at a cost of $2,500 a mile.

"Alcohol," said Mr. MacDonald, "is now successfully made from corn, sorghum, barley, rye, wheat, and potatoes. Gasoline carrying ten per cent. of this type of alcohol is now being sold in 2,000 U.S. filling stations at prices competitive with gasoline," and quoted an authority for the statement that "within ten years the U.S. will be using 20 per cent. of such grain alcohol blended with gasoline for motor cars, and that within 20 years this industry will be producing 50 million gallons of 'agricuole' at a selling price of between 15 and 20 cents per gallon with handsome profits."

Mr. MacDonald made his citation in support of a plea for the expenditure of further energy and money for research work, a plea which should not go unheeded in the light of results that have been achieved on the other side of the international boundary and the necessity of applying science to the peculiar problems of Western Canadian agriculture.

TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Pep that Sends You Bounding Up the Stairs

People who smother to death die because oxygen has been completely cut off from the blood. That is why you must have iron to help build your blood cells and surrounding red corpuscles are your oxygen-carriers. They carry the oxygen you breathe in to every part of your system. Without enough oxygen-carrying corpuscles, your tongue, liver, stomach and bowels slow down. Your skin gets pale, flabby, often pimply. Your nerves may become jittery—you tire quickly—feel depressed.

What you need is Dr. Williams Pink Pills. These world-famous Pills help make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Get Dr. Williams Pink Pills today at your druggists. Say "Dr. Williams" positively. Only Dr. Williams Blood-Builder will help give you back your pep. Doc. 104. G.S. Painted in Jail

An Annual Event

Father John Caulfield has now been 25 years the parish priest at Pilner. At his annual church fete the well-known Pilner "Derby" is run, the mounts being donkeys and the riders the best-known jockeys in the country. Friend of everyone he is looked upon in particular as the "padre" of jockeys and actors. And he is always remembered by an invitation to the Buckingham Palace Garden Party.

Bristol county, R.I., is the smallest county in the United States, having an area of only 24 square miles.

It is possible for an aeroplane to make a safe landing with only half a propeller. 2295

A Story In Stone

To Preserve The Badlands Of Western South Dakota

One of the most fascinating areas on this continent, barring not even the mammoth Grand Canyon in Colorado, is the area known as the White River Badlands of western South Dakota. It is an area well known to Canadian tourists, many thousands of whom have marvelled at the story of those stone formations. Therefore Canadians, along with many Americans, will rejoice to know that President Roosevelt has just signed an executive order creating the Badlands National Monument, which brings 150,103 acres of that area within the orbit of the United States Park System. From frontier territory to recreational territory—that is the progression.

But the Dakota Badlands have had a much longer history than that. They belong to the oldest mountain formations in the world. They were laid down soon after the subsiding of the vast Cretaceous seas, when Time was very young indeed, and before the Alps and even the Himalayas had reared their hulks. Eons of erosion etched them. Saber-toothed tigers, giraffes, rhinos, oreodons, three-toed horses, camels—all these and more once roamed its lush valleys and lurked in its winding canyons. But the winds and waters altered the pinnacles and domes and gorges, and those prehistoric animals made way for the buffalo and antelope and mountain lion, and those later beasts in turn made way for the lowly jack rabbit and slinking coyote and pert prairie dog. Time marched on. But the stones recorded all those stages of the Badlands, and students have visited them for nearly a hundred years (the first expedition was in 1846) to read the story.

This new move, to preserve the Badlands as a national monument, is therefore sure to win wide approval. Accessibility, certainty of care and authoritative exploitation, should add many more pages to Earth's history. And another recreational centre will be welcomed by tourism.—Winnipeg Free Press.

According To Survey

Women Are Less Likely To Contract Pneumonia Than Men

Men are more apt to contract pneumonia than women.

This conclusion was reported by the United States Public Health Service on the basis of a survey of pneumonia frequency in 1937. The survey disclosed, the health services said, that the rate among males was six per 1,000 persons and among females 4.9.

No conclusion was reached as to why men are more susceptible.

The report also said it was found that pneumonia strikes with greatest frequency in the lower income groups.

"The pneumonia case rate among relief families was over twice the rate of that among families in the upper income groups," the report said. "There was also an excess in the rates among families who were not on relief, but whose incomes were less than $125 a month.

Preferred Short Sermon

Queen Victoria Had Pulpit Equipped With Time Glass

According to the Manchester Guardian royalty in general has never cared for the long sermon. Queen Victoria is a case in point. She issued no orders, but she presented the Savoy Chapel with a pulpit glass whose sands were timed to run out in 18 minutes. Many a preacher must have eyed that glass with considerable nervousness in the course of his sermon.

Butter Consumption

Consumption of butter in Empire countries is higher per head of population than in foreign countries, states the Imperial Economic Committee. It amounted in 1937 to 40.7 pounds in New Zealand; 34.2 pounds in Australia; 32.7 pounds in Canada, and 24.8 pounds in the United Kingdom, compared with 19.6 pounds in Germany; 17.9 pounds in Denmark and Belgium, and 16.7 pounds in the United States.

Must Have Been Scotch

While flames destroyed a garage and an automobile within it at Tillsonburg, Ont., a nonchalant neighbor appeared with a long-handled shovel, approached the building, scooped up a shovelful of coals, and returned to his home to light the kitchen stove.

Considerable damage may result if an automobile starter pedal is pressed while the motor is running.

Deficiency More Marked

Large Number Of Children To-day Are Not Good Spellers

There are a lot of justifiable complaints against the results of our modern education, and not the least among them is that youngsters today are not good at spelling—as a rule. Of course, there have always been those who could not master spelling, but the deficiency seems more marked to-day than ever. Youngsters to-day are undoubtedly more advanced in many things than they were at the same age a generation ago, so perhaps spelling must suffer as a result of this greater general knowledge.

England's Highest Honor

Bronte Sisters May Be Commemorated In Westminster Abbey

The Buffalo Courier-Express says tribute will be paid not only to three Yorkshire novelists, but to fiction writers in the English language and to women in general by the proposed commemoration of the Bronte sisters in Westminster Abbey, England's highest honor.

Emily, Charlotte and Anne Bronte belong not only to England but to every person anywhere in the world who can read a book in English. Jane Eyre is one of the great novels, read and beloved by millions in generation after generation; Wuthering Heights, which long was overshadowed by Jane Eyre, has grown in favor during the last few decades, librarians say, and may one day assume stature equal to the more famous book in the affection of booklovers. Both books have been made familiar to the public of stage and screen, and the Bronte sisters themselves have been fascinating subjects for biographers, novelists and playwrights.

Many novelists, renowned in their day and perhaps a few years after, are forgotten. Few who read to-day bother to wade through Trollope or Reade r Hardy r Meredith, but the Brontes are as alive as ever. It is surprising that Westminster Abbey waited for them so long.

Obeys Radio Commands

Dog Trained By Australian Police Reacts Perfectly To Set

The police in Sydney are training Alsations to obey radio commands. Zoe, the only dog fully tested, has reacted perfectly to a set carried on a back saddle. It weighs eight pounds and includes batteries, a loud-speaker and an aerial. Zoe has carried out the following radio orders: Fire a revolver, climb an eight-foot trestle and return backwards, turn on a tap and fill a water can, and remove and replace collar. When the set was first strapped to her body, Zoe registered amazement at the voice emanating from it, but quickly accepted the instructions.

The duckhawk prefers to take its prey on the wing. It will land on a limb beside an intended victim, knock the bird off, and capture it in mid-air.

Temperatures can be roughly told by timing a cricket's chirp. The warmer the weather, the faster he sings.

Conservation Work

To Stock Marshes With Beaver And Muskrat

Beaver will be called upon in the next few years to do a job too big for man and science, Col. T. C. Newcomen, administrator for Ducks Unlimited, game bird conservation, society, declared in an address at Edmonton.

The job, he said, will be restoration of water-levels in lakes and marshes in northern Alberta and Saskatchewan. Three large areas in northeastern Alberta already have been set aside for such work through an arrangement with the Alberta government, he said.

Beaver and possibly muskrats will be stocked at the bottle necks leading from the marshes and lakes to the larger rivers. Col. Newcomen expected supervised trapping in areas would be permitted after five years. Indians and half-breeds now inhabiting the areas will be employed as paid game guardians, he said.

Almost all snowflakes are six-sided. The only exceptions are a few with three or twelve points. No two snowflakes are alike.

Building Up New Nation

Chinese Setting Up New Factories In Interior Cities

China is building a new nation in the comparatively undeveloped interior beyond immediate reach of Japanese forces, utilizing credits extended her by Great Britain and the United States.

Well-informed persons, who disclosed for the first time what China was doing with the credits, said that nation's only chance of defeating the Japanese was to wear them out by creating a virtually new China in what was once the hinterland.

Natives carried machinery with them when they evacuated manufacturing centres, and are setting up new factories in cities virtually unknown to the Occident. Now they are buying machinery in Great Britain and the United States with which to equip the factories. Some of the machinery probably will be used in making arms and ammunition.

Between 1,000 and 2,000 freshly-ordered trucks will be used to connect China with the west over the new 2,000-mile road opened between the provisional capital of Chungking and Rangoon, Burma. American Ambassador Nelson T. Johnson reported recently that the road was completed in eight months solely by native labor directed by Chinese engineers. Johnson made the trip from Chungking to Rangoon in 17 days by automobile.

The Export-Import Bank, in advancing the United States credit, stipulated it was to be used for industrial and agricultural products, since China does not need food, authorities say its officials are purchasing agricultural machinery to be used in developing arable lands whose return has been small because of primitive cultivation methods.

Training For Jobs

Responsibility Comes With Experience And Not Necessarily Education

Mr. Mutch, one of the members for Winnipeg, told the House of a young man in that city who said he had "spent years" in preparing himself "for a responsible position," presumably was complaining because such a post still eluded him. Mr. Mutch said, and very properly, that the young man should have been preparing himself for a job, that responsibility comes with experience and not necessarily with education.

There is point to the observation. Academic instruction, the self-finding one gets from books, does not by any means completely equip a young man for posts of responsibility, for the management of a business or the direction of a staff. That aptitude comes from practical experience.

The objective of every young man must be a job, and he should not be too much concerned about its nature. One job, he will find, is a good jumping-off place for other and better jobs. If he is intelligent and ambitious he will learn more in a month on somebody's payroll, no matter how modest the sum opposite his own name, than in a year of theory and study. He will learn not only his own job but about getting along with men, and he will begin to fit himself for posts of responsibility and trust.—Ottawa Journal.

Tour Too Expensive

"Coronation Scot" Will Not Be Coming To Canada This Year

The "Coronation Scot," ultra-modern London-Glasgow streamlined train, will not visit Canada on its coming American tour, British railways officials said at New York.

The British luxury flier, which holds the world's steam traction record for a distance haul at over 60 miles an hour, arrived at Baltimore Feb. 13 from where it will begin a 3,121-mile tour of 38 United States cities before going on exhibit at the New York World's Fair.

Decision to omit Canada from the itinerary was based on the "high operating expense" of the tour, the officials said.

A Weird Creature

A small, rare mammal related to the monkey and found only in Madras and Ceylon, the slender loris is a weird creature because of its large, brilliant eyes. Astonishingly deliberate in movements, it approaches its prey with almost imperceptible advances.

Needs A Passport

A farmer in Czecho-Slovakia woke up the other morning to find that the new border with Hungary stretched right across his farm. Though the farmhouse is still in Czecho-Slovakia, his fields are now in Hungary, so that he must show his passport every time he goes to work in his own fields.

The pepper plant grows leaves that jump as though animated.

Synthetic Coal

Scientists Make Soft Coal From Farm Products

In an emergency farmers may grow soft coal in their fields.

The fact that fairly good soft coal is now being made from sugars, the carbohydrates of farm crops, was reported to the American Institute of Mining and Metallurgical Engineers by E. Berl, of the Carnegia Institute of Technology.

The sugar coal is too expensive to be practical but was made to settle an old controversy about the origin of coal and oil.

In the Carnegia laboratories, the artificial coal is made in two ways. Sugar heated in water at high temperature produces a sandy form of coal.

When weak alkali is added to the water, Berl said, "excellent coking coals" are the result. Adding pressure to the hot sugar water increases the amount of carbon in the man-made coal.

These farm product coals, Berl said, can be treated by hydrogen to make oil. The same way which "hydrogenated" coal is obtained in Germany and Great Britain. These products include gasoline and oil for motor cars.

The old idea, said Berl, that coal came from the woody, or lignin, part of plants is as dead as the idea that petroleum is from dead fish. He said the Carnegia experiments show that coal, oil and bitumen all come from carbonhydrates in plants.

Timber Wolves A Menace

Large Numbers Are Reported In East Kootenay District

In great numbers, timber wolves, coming down from the north, are roaming the Kootenay plains, 200 miles northwest of Calgary, this winter.

Indian hunters and trappers report the wolves, a menace to all wild life, increased rapidly this winter.

Government, not to show us big bounty before we go looking for timber wolves," Indian trappers told a fur trader at Rocky Mountain House, 50 miles east of Kootenay plains. "They're bad medicine; plenty Indians won't come back when they go hunting them."

In the sparsely settled Plains district few wolves saw timber, shot, or trapped, and as the Indians put it:

"They have raised lots of little wolves and now the young ones are moving closer to town."

Indians fear the big grey marauders of the north country and the traders say white trappers have shown little inclination to track down the wolves.

Fastest Warship

Streamlined Torpedo Boat Glides Along At Fifty Miles Per Hour

The world's fastest warship, a 70-foot torpedo boat without mast or funnels, and so streamlined as to present practical no "target silhouette" — sped across Southampton water at 50 m.p.h. in trials.

The warship, designed and developed experimentally at a cost of $380,000, has a cruising range of 1,000 nautical miles at a speed of 22 knots —more than double the performance of the two flotillas of motor torpedo-boats he has already supplied to the navy.

The new craft is driven by three 1,000-h.p. Rolls-Royce engines, and carries two 21-inch torpedo tubes or four 18-inch tubes—as well as three guns, smoke screen apparatus, and depth charges.

St. Helena Natives

May Be Provided With Employment In Britain

Girls from St. Helena—the lonely British island in the southern Atlantic famous for the exile of Napoleon who have a mixture of British, Dutch-Portuguese, East Indian and African blood in their veins, may shortly be working as domestic servants in English homes.

As part of the British government's scheme to alleviate the economic and social distress in the island, officials of the Colonial Office and the Ministry of Labor are preparing a scheme for employment in England.

As a port of call the island, whose flax industry has fallen into decay, lost its importance with the opening of the Suez Canal.

An enterprising insurance company in Rome has a new bonus plan, giving a gas-mask free to everyone taking out a policy.

The Gulf Stream has clearly defined "banks", dividing it from the colder ocean water, through which it flows.

If they have more than 25 guests for dinner, an old law requires Los Angeles residents to obtain a picnic permit. 2295

EARTHQUAKE WRECKAGE

This latest original photograph from Chile earthquake area shows the wreckage of buildings in the plaza in Concepcion, where more than 3,000 persons died. The death toll is estimated at approximately 30,000.

Valued As A Relic

American Souvenir Hunters Would Buy Old Electric Lift

One of the oldest electric lifts in London has excited the envy of American souvenir hunters, who value it both as a relic and for its historical associations, states the London Sunday Express.

For more than a generation it has functioned—when it was in a good mood—at the Foreign Office. Among its most distinguished loads were the statesmen who signed the Locarno Pact, whom it carried to the very door of the now famous Locarno Room.

Nobody in the Foreign Office today can remember when it was installed. Its present attendant "inherited" it from his father, who spent a good part of his lifetime in coaxing it up and down.

Once, when an additional floor was built on to the Foreign Office, the ancient lift went on strike for a week.

American dealers have approached the authorities with an offer. They want it for exhibition purposes.

The brown house rat is believed to have invaded Europe from Asia in 1727, by swimming the Volga River. Since then, it has invaded the rest of the world, travelling on man's ships.

Our globe is encircled with more than 300,000 miles of submarine cables, 100,000,000 miles of telephone wires, and 5,000,000 miles of telegraph wires.

High speed motion pictures have shown that stretched rubber bands return to their normal at a speed of more than 200 miles an hour.

Savings Well Guarded

Nothing Is Sounder Than Banking System In Canada

"It would be difficult to find any country in which guardianship of the people's savings has been more faithfully discharged than in Canada. Not for 58 years has any banknote passing as currency been dishonored." This excellent bit of advertising copy was buried deep in a seven-column report of the annual meeting of the Dominion Bank. The speaker, President C. H. Carlisle, also observed: "Those who assail our banking system, and, as well, our industries, are usually those who are seeking public office and who are well aware that there is no easier way to gain support than by exciting prejudice against those who appear to be successful. This is a well-known device in every democratic country and has brought about the failure of democracy in more lands than one."—Marketing, Toronto.

Only Eight Living

Princess Louise Oldest Of Former Rideau Hall Ladies

Canada has had 15 governors-general since she became a Dominion, says the Vancouver Province, and 15 distinguished ladies have presided at Government House. Princess Louise was the fourth of these. Ten of the former governors-general are gone and only four survive. But of the Rideau Hall ladies eight are still living, Princess Louise much the oldest of them.

It is estimated that waters of the Rocky Mountain region were stocked with trout about 8,000,000 years ago, before the impossible mountain barriers of to-day existed.

Champion Bell-Ringer

Honor Has Been Given To Woman In England

Miss Sylvia Bowyer, 22, who set up a record by ringing 62 peals last year, is named the new world's champion bell-ringer. She is master of the St. Mary-le-Tower Society at Ipswich, England, acknowledged as the finest 12-bell society of ringers in the country.

"Bell ringing is the most fascinating hobby one could have," she said. "I have been ringing for nearly four years and I still feel I have a lot to learn. It is a wonderful exercise and keeps me slim."

Weighing barely 112 pounds and standing five feet, two inches, Miss Bowyer has pealed bells weighing 1,650 pounds. Altogether she has rung 113 peals and a peal may take anything from three to four hours.

George Symond, secretary of the society, said: "Sylvia is a wonderful ringer. She has the touch and also the 'headpiece', which is very important. She can work out the various combinations in a flash."

In 1911, Colonel "Buffalo" Jones visited Africa and captured a rhinoceros, a giraffe, a lion, a zebra, a cheetah, a wart hog, and many other animals, using only common lasso ropes and cow ponies.

To tour his vast sheep ranches in Tierra del Fuego and on the mainland of South America, a Scotchman has purchased an airplane.

When you begin to think of yourself as a weather prophet, you are getting along in years.

According to estimates, cocktails can be mixed in 4,000 different ways.

CONTRASTING SCENES FROM THE SPANISH BATTLEFRONT

These two pictures give graphic descriptions of the war in Spain. At the top General Yagus reviews Moorish troops which took part in the capture of Barcelona, while at the bottom women and children refugees flee to France to escape the attacking insurgents. The latter picture was taken at Le Perthus, France, as the refugees were about to board trains to take them into the French interior

Might Be Possible

Italian Naturalist Believes Britain Is Lost Island Of Atlantis

Great Britain, according to Prof. Vittorio Calestani, the Italian naturalist, is none other than the fabled Atlantis, the lost island of which Plato wrote on more than one occasion. If Professor Calestani is right, the search of men through many ages is at last ended, and their prehistoric legends confirmed.

Atlantis is said to have been a renowned kingdom 9,000 years before the birth of the Greek philosopher Solon, and the question of its existence was seriously debated even as late as the eighteenth century. Montaigne, Buffon, and Voltaire all gave the matter their sharpest attention.

The proofs which Professor Calestani advances are highly ingenious: Atlantis had a giant temple of Poseidon; that must be Stonehenge. The island was governed by philosophers—an obvious reference to the Druids, of course. It was flat, and surrounded by mountains—well, the Welsh mountains border the central plain of England. The fact that Atlantis is reputed to have sunk beneath the waves might be thought to introduce a difficulty, but Professor Calestani lightly brushes it aside. After all, he reflects, this part of the story was probably an exaggeration. An exaggeration, one may add, which is only greater than that which assumes Britain itself will soon sink out of sight. — Christian Science Monitor.

Cannot Be Improved On

True Pumpkin Pie Does Not Need Any Additions

We note with dismay a tendency in the household pages of the press to monkey with the pumpkin pie. A girl who gets up recipes for tasty provender suggests a coating of shredded coconut "to give the old dish a new accent." Another goes so far as to urge a topping of meringue—the ultimate humiliation for any pie. No one has advised mayonnaise, but it may be that this is saved for another year.

The true pumpkin pie is no more than a custard, with additions. A pumpkin by itself is nothing, and for whatever reputation it has it must thank the company with which it mingles. It is in a position much like that of the illustrious Red Grange, whose name occupies an analogous niche in football. With magnificent interference of ruining ahead at Urbana, Grange was an irresistible force. But out in a cold professional world, stripped of his old allies and strictly on his own, Red got practically nowhere. It is the same with the pumpkin.

In a pie the pumpkin finds its destiny, which is merely to lend substance to the whole. To attempt to improve on the standard pumpkin pie ranks well up among feats of lily-painting. It is perfect in the form prescribed in any cook book with a decent respect for tradition and true art. To go beyond that—to add another thing—simply makes it a mess. —Detroit News.

Thinks Beavers Stupid

And Man Tells This Story To Prove His Belief

After 35 years of watching beaver actions, I noticed this fall that they pulled a new one. They built a dam just below a road in Aberdeen township, 40 miles east of this city, states Dan McDonald in the Soo Star. This raised the water on the road. Then they started a house on a wooden culvert right in the centre of the road. The cars passing in the daytime ran over their work, but they kept on building in their slow way, not at all bothered by the cars scattering their work. I know of no other animal or bird that would persist in building their home after it had been knocked around every day for more than a month.

From Old Paper

New Process For Making Newsprint Said To Be Success

Dr. W. F. Hochsettler, inventor, is reported to have succeeded in "de-inking" old newspapers and using the paper to produce fresh newsprint. The Pittsburg Post-Gazette ran off an edition in which four pages were printed on the "de-inked" paper. Old newspapers, magazines, posters, and even carbon paper went into mixture that produced the new paper, bleached by a chemical process.

Claims are made the paper can be produced about one-third cheaper than present newsprint prices.

Sap from bottle trees quenches the thirst of Australian natives in time of drouth.

In a new car parking place in the heart of Cologne, Germany, children and dogs are cared for.

For 24 Years Vicks Advertising has been passed upon by a Board of Physicians.

CLEARS STUFFY HEAD

Helps Prevent the Development of Colds, too

NOW, it's easy to relieve head cold discomfort. Just put a few drops of Vicks Va-tro-nol up each nostril and feel the tingle as Va-tro-nol's stimulating medication reduces the swollen membranes, clears away the clogging mucus, helps to keep the sinuses from being blocked by the cold—lets you breathe again.

NEXT TIME, don't wait until your head is all stuffed up. At the first warning sneeze or sniffle, use Va-tro-nol at once—it helps to prevent many colds from developing.

Va-tro-nol is *specialized* medication—expressly designed for the nose and upper throat where most colds start. Used in time, it stimulates Nature's own defenses to fight off many a cold, or to throw off the head colds in their early stages.

VICKS VA-TRO-NOL

WORLD HAPPENINGS BRIEFLY TOLD

Eire has officially announced her recognition of the General Franco government of insurgent Spain.

Thirty community pastures have been established in Saskatchewan. These embrace 473,460 acres, enclosed by 922 miles of fencing.

The band of the Portsmouth division of the Royal Marines will not accompany the King and Queen to Canada, it has been announced.

Hon. W. L. Houck, Ontario Hydro commission chairman, predicted in an address that 90 per cent. of New York's World's Fair visitors will also visit Niagara Falls.

A suggestion a fully qualified farmer be appointed to the Canadian board of railway commissioners was contained in a resolution presented to the Ontario Agricultural Council.

The United States supreme court sustained anti-trust charges brought by the justice department against a group of leading motion picture distributors and Texas exhibitors.

The Earl of Egmont of Calgary will visit England in the near future and take his seat in the house of lords, said Miss Elfie Moodie, Lady Egmont's sister.

Three Royal Air Force flyers were killed when their plane crashed into the side of a mountain and burst into flames near the Palestine-Trans-Jordan frontier during fog.

The Chinese government was reported to have reached an agreement with French and Russian authorities for establishment of Chinese-French and Chinese-Russian air lines connecting west China with those nations.

Will Be Ready Soon

Naval Base At Singapore Has Taken 15 Years To Build

The great naval base of Singapore, key of British Empire defenses, will be completed and ready to operate at full capacity this year.

The dockyard, most modern in the world, will be in a condition to maintain a full battle fleet. Every protective gun will be in position and the big air base besides the naval fortress will be in ful commision, with a chain of outlying bases to guard the base.

Although no ceremony has been planned for the actual completion of the base, people of Singapore already are expressing the hope that the Duke and Duchess of Kent might pay a visit to Singapore on their way to Australia.

The base has taken fifteen years to build and has cost about $100,000,000. Naval works alone cost $57,000,000. The heaviest guns in existence, in well camouflaged emplacements, guard the base, and the anti-aircraft defenses are described as unparalleled.

Until now Britain could not have operated its heaviest units in Eastern waters because of the lack of a suitable base for maintenance.

Made Plan From Map

An Englishman, one Henry O'Hagan, drew up complete plans for the great belt line known as the Chicago Junction Railway without ever having visited that city. He did all the planning by referring to a large-scale map of Chicago in his London home.

Mr. I. Keen, of De Cham Road, St. Leonards-on-Sea, saw a metal object on the water's edge. It was his own wartime identity disc which he lost on the same spot on leave in 1917.

How You May Reduce Varicose or Swollen Veins—Heal Ulcers

A Simple Home Treatment

The progress is amazing. Today many amount that took weeks to overcome can be halted much more quickly. If you have varicose veins or hunches, start today to bring them back to normal size and if you are like you will be glad to.

Just get a 2-oz. bottle of Moone's Emerald Oil at any dispensing pharmacist and apply it night and morning to the affected veins. In a short time the veins should begin to grow smaller and by regular use soon approach normal.

People who want to reduce varicose veins or heal ulcers should not hesitate to try a bottle at once. It is so unbelieving and economical that a small bottle lasts a long time.

Made Many Improvements

Vatican City Became Modern Under Reign Of Pope Pius

Visitors to Vatican City soon discovered why Pope Pius gained the sobriquet of the "modern pope". It is written in steel and marble throughout the tiny state. During his reign, Pius spent millions of lire in Vatican City improvements, mostly after settlement of the vexatious "Roman question," in 1929, which left him sovereign ruler of a definite, temporal state.

The Vatican railroad and station and the broadcasting outfit are perhaps the best-known improvements abroad, and Vatican citizens are equally proud of the new palace of government and the modern electric plant. But the real jewel in the eyes of the Vatican engineering staff is the 60,000,000-lire water system, which transformed a 1,000-year-old layout of cement conduits into 100 kilometres of specially-treated acid-resisting pipe. It gave the Vatican gardens a lawn-sprinkling system.

The Vatican railroad station, built of travertine stone, stands near the great iron gate which opens automatically when a train approaches. For its size, it is the most sumptuous station in the world, with a frontage of 180 feet and a central hall of 60 feet high. The railroad cost about $1,500,000.

CHIC FROCK ADORED BY KIDDIES

By Anne Adams

The bolero-frock and the suspender-frock are "best beloveds" in fashion—well do kiddies know it from what the grown-ups say! Pattern 4004 combines both styles, and is therefore sure to be almost idolized by "four to twelvers" . . . while mothers will appreciate its easy making and its usefulness. One bolero will do with two frocks—and serve as an extra garment after playing or as a street jacket next Spring. Choose a serviceable wool serge or crepe—or stitch up a pretty plaid, to show off the very pretty bias cut of the skirt! Have plenty of tubcotton blouses so there'll always be one ready to put on.

Pattern 4004 is available in children's sizes 4, 6, 8, 10 and 12. Size 6, jumper, takes 1¾ yards 35 inch fabric and blouse, ⅝ yard 35 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 176 McDermot Ave. E., Winnipeg.

Besides being used in medicines in China, fireflies furnish a grease, which is used by Oriental woodworkers for hardening bamboo.

Although cooler than the outside air, the interior of the Great Pyramid at Gizeh, Egypt, is excessively hot, due to lack of ventilation.

World Seaplane Record

The Mercury May Make Another Trip To America

"Mercury," upper component of the first Short-Mayor composite aircraft, and holder of the world seaplane distance record, and two long-range Albatross landplanes may supplement the fleet of four 24-ton flying boats which are scheduled for this year's experimental airmail services between London, Montreal and New York.

Since the "Mercury" surpassed the previous distance record by 800 miles with a journey of 6,045 miles from Dundee to the estuary of the Orange River, South Africa, she has done useful commercial work carrying mails between England and Egypt. Earlier in 1938 she accomplished a fast return trip over the Atlantic, going direct from the Foynes seaplane base in Ireland to Montreal and returning from New York in shorter stages over the southern route of the Azores and Lisbon. On her flight to Canada she carried a considerable payload, thereby earning distinction as the first aeroplane to transport cargo across the North Atlantic; her return stages were flown at speeds varying from 170 to 200 m.p.h.

The composite aircraft invention proved, therefore, that it enables a substantial payload to be carried across the ocean without extravagant expenditure in power but with an ample margin of range to ensure security.

Subsequently the "Mercury" has been launched with loads far exceeding the load airborne when she parted from her bearer 'plane "Maia" at the start of the Atlantic crossing. In all likelihood she may cross the ocean next time with hundreds of pounds more in cargo than were transported on that first run.

Two de Haviland Albatross landplanes were built to air ministry order for long-distance airmail experiments. Their specification called for carriage of 1,000 pounds in payload over a distance of 2,500 miles non-stop against a constant headwind. Averaging not less than 40 m.p.h. In practice the Albatross mail-carriers can exceed this requirement, and attain it on 62 per cent. of full power of the four Gipsy Twelve engines at a cruising speed of 210 m.p.h. Calm air range is 3,300 miles.

Aerodromes at Ennis, on the River Shannon, and in Newfoundland are now nearly ready for use; they will be the ocean terminals of the Albatross flights.

Initially the experimental service will run once weekly between England and New York; before the end of the northern summer this frequency will be doubled.

A Fine Review

Recent Issue Of Canada's Weekly More Than Usually Attractive

Canada's Weekly is a social and commercial paper published in Old London, edited by Sir Percy Hurd, M.P., which tells Canadians resident in the United Kingdom what Canadians are visiting there and where they may be found or written to; it gives a summary of Canadian news, and it contains an assortment of commercial information useful alike to British firms doing business with Canada and Canadian firms doing business with Great Britain.

The issue of January 20 which reached this country, is the annual financial and mining review, comprising over 100 pages, printed on most excellent paper and profusely illustrated with photographs and charts. It gives a survey of Canadian industries from coast to coast, province by province, and among the contributors are Hon. Charles A. Dunning, Minister of Finance, Hon. I. A. Mackenzie; Minister of Defence, Hon. C. D. Howe, minister in charge of aviation, the presidents of the Canadian National and Canadian Pacific railways and many others, including an informative article by Frank G. Lawson, president of the Toronto Stock Exchange, addressed to British investors. The issue is one of the finest reviews ever assembled in completeness and attractiveness, and in the hands of British people should be a valuable medium for the promotion of business and investments between the two countries.—St. Thomas Times-Journal.

Has Never Been Done

There never has been a round-the-world airplane flight in that such a flight would require girdling the globe at its greatest circumference, either along the equator or along a single degree of longitude.

ITCH Use D.D.D. Prescription STOPPED QUICKLY

Try ICE CREAM *made by Jack Frost*

LET Jack Frost and your own kitchen still take care of your dessert-worries. Just mix a package of Jell-O Ice Cream Powder (cost about 12¢) with one quart of half milk, half cream. Put the bowl outside on your window-sill in freezing weather—stir a few times and Jack Frost'll do the rest! And she result —the smoothest, richest ice cream you ever tasted! Comes in 5 tempting flavours—chocolate, strawberry, vanilla, maple, lemon. For three pints of delicious, economical, easy-to-make ice cream ask your grocer for it today! JP9

JELL-O ICE CREAM POWDER

No Disarmament

Says U.S. Government Must Arm For Protection Of Nation

Cordell Hull, secretary of state, said there was no basis for hoping for a world disarmament conference at this time and that the United States government should "carry out its responsibilities for the protection of the American nation."

Replying to a letter from Representative Ludlow (Democrat, Indiana), he said the United States had repeatedly declared its willingness to disarm. Recalling the world conference at Geneva in 1932 and the naval conference in London in 1935, he said:

"Unfortunately, nothing has happened since that time which gives any basis for hoping that the obstacles which stood in the way of reaching an agreement among all the principal naval powers have in any way changed for the better."

SELECTED RECIPES

DOWN-SOUTH BISCUITS

4 cups sifted cake flour
1 teaspoon baking powder
½ teaspoon soda
1 teaspoon salt
¾ cup lard
¾ cup buttermilk or sour milk

Sift flour once, measure, add baking powder, soda, and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Turn on floured board and knead lightly two minutes. Roll ¼ inch thick; cut with small floured cutter. Bake in shallow pan in hot oven (450 degrees F.) 12 minutes. Makes 2½ dozen biscuits.

PUMPKIN PIE

Pastry for 9-inch pie
1½ cups coconut, premium shred
2 cups cooked mashed pumpkin
½ cup sugar
½ teaspoon mace
½ teaspoon cinnamon
½ teaspoon allspice
3 tablespoons melted butter
2 eggs, slightly beaten
2 cups milk, scalded

Line a 9-inch pie plate with pastry, rolled to ⅛-inch thickness. Combine ingredients in order given and mix thoroughly. Pour into pie shell. Bake in hot oven (450 degrees F.) 20 minutes, then decrease heat to moderate (350 degrees F.) and bake 30 minutes longer.

New Appliances

Says Inventors Must Consider The Effect On Economic Life

In developing a new appliance, engineers must take cognizance of its effect on the economic life of the world, Dr. R. C. Wallace, principal of Queens' University, Kingston, Ont., told more than 200 engineers at the annual convention of the Engineering Institute of Canada at Ottawa.

He cited effect of development of the automobile upon the world. Homes became less permanent as travel increased and living standards changed almost overnight. Motorists insisted on better roads, and governments were forced by public opinion into programs of highway construction they could ill afford.

Leather workers of South Africa are boycotting Japanese goods.

Makes Good Hideaway

No Better Place To Disappear Than In A Big City

To get away from it all, the best method, by general consent, is to take refuge in a great city. There, an indistinguishable atom, among millions of others, who care nothing about one more added to their number, the seeker for seclusion can be undisturbed. In fact, there have been cases where a man who had vanished from home, family and business, and had dropped from sight as completely as if he had stepped into an open maqhole, had lived for years within a few blocks of his former abode. Any metropolis shelters hundreds of such embusques. Usually they remain unknown; often they must pay those who know their secret to remain hidden, as in the case of Musica, who called himself Coster, and who, while he swindled others, was himself the prey of blackmailers.

An unusual instance of disappearance and discovery is that of a former Texas banker who has admitted that, under another name he has been serving a milk route for six years in Memphis. If he chose his occupation deliberately for purposes of concealment, he was shrewd. For the milkman usually plies his calling in early hours, when few are about and seldom sees his customers. But since the Federal government began to take an interest in banks which is the next thing to proprietary, financial fantastics by any one below the rank of a New Deal official have become dangerous. Consequently a circular sent out after the banker's disappearance, which bore his portrait, was at last identified by some one who noted the likeness to the milkman. He was arrested and denied his guilt; but will return to Texas for trial. The unmoral is that if he had fled to a metropolis he might not have been caught.—New York Herald Tribune.

Success And Promotion

Young Man With Initiative And Ability Can Have Both

It is not sufficient that younger men be given a chance—it is of even greater importance that young men prove themselves worthy of appointments and promotion.

There are countless jobs ready and waiting to be tackled in Canada to-day whenever and wherever young men show the ability, the initiative and the resourcefulness to do them.

Even in the darkest days of a depression it is never literally true that there are only so many jobs to go around. Every young man who has initiative and resources creates something not only makes employment for himself but often for others as well.

Promotion and success come from accomplishment.—Financial Post.

Develop Trade

U.S. May Arrange Extensive Barter Deals With Germany

German sources said negotiations are under way for extensive barter deals with Germany and organizations of farmers and packers in the United States midwest.

Under such deals, which official American sources said could be handled by non-governmental agencies without any special permit, the farmers and packers might exchange their agricultural goods for German-manufactured articles.

Dr. Wilhelm Tannenberg, first secretary of the German embassy at Washington, told representatives of midwest co-operatives it was said, Germany would be glad to enter into barter arrangements for lard and wheat, taking several hundred tons of lard and 150,000 tons of wheat.

Would Be Invaluable

"Can you do double entry?" asked the employer of the prospective employee.

"I can do triple entry," was the reply.

"Triple entry?"

"Yes—one entry for the working partner showing the true profits, another for the sleeping partner showing small profits, and a third for the income tax collector, showing a loss."

Many Signatures Needed

It took trustees of Eliza Snyder's estate five years to complete a deed transferring 16 acres of land to Emanuel's Evangelical Church Cemetery Association in York, Pa. Ninety-seven heirs and as many witnesses — scattered throughout the country—had to sign the document.

Point Barrow, Alaska's northernmost town, has not recorded a temperature lower than 54 degrees below zero in 40 years, while Montana has recorded temperatures of 68 below.

Chinese merchants employ firefly catchers, who do nothing else during the summer months. Experts catch as many as 3,000 of the insects in a single night.

Health LEAGUE of CANADA presents TOPICS of VITAL INTEREST

by DR. J. W. S. McCULLOUGH

THE HABITS OF WOMEN

I frequently saw Mary Seaton as she travelled to her job by the same street car. She was a striking-looking girl, tall, erect and well turned out. The darlingest little hat, shaped just like a pill-box and not much larger, topped her golden curls. It was winter and her blue eyes were matched by the blue of her frock which, to borrow a commonly-used phrase was "long enough to cover the subject and short enough to be interesting." She wore a grey coloured fur coat which was not becoming. Her stockings were of the sheerest silk. They would not suit me who am accustomed to the thickest woollies, but I should not quarrel with any item of her attire except the foot-gear. They weren't shoes! They were sandals!

As I sat behind this beautiful young creature I saw her cough into her handkerchief. The cough was repeated and I observed a streak of blood. I was disturbed.

Why are young girls so foolish? Why are their mothers so careless? Why tempt fate as Mary Seaton did?

I missed her after the incident referred to. Then I heard that she was in the "San". Now and then there were hopeful reports. She was progressing favourably. She would be home for Christmas.

In the rush of Christmas Eve, I bought a paper to read on the car. I glanced at, among other items, the R.I.P.D. I caught the diacritic name of Seaton. It was Mary's name. Dead at 21. How sad!

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to—The Health League of Canada, 105 Bond St., Toronto, Ont.

Altering Government House

Australia Is Getting Ready For Her New Governor-General

Although Federal, State and municipal authorities have not reached satisfactory arrangements for a home in Melbourne for the Duke of Kent and his family, plans are going forward for the residence in Canberra of the new Governor-General. Work has begun on alterations in the Government House in Canberra, including day and night nurseries, a special kitchenette for the preparation of children's meals and nine additional bedrooms.

Asked to write the shortest essay on two of life's greatest problems the winner wrote "twins".

IF YOU FEEL SUNK

Read this and cheer up

Are you so blue that life is no longer worth living? Do you cry easily? Do you feel low, weak, nervous, discouraged, dissatisfied? SUNK?

Then here's good news for you in case you need a good general system tonic—just take famous Lydia E. Pinkham's Vegetable Compound. Let its wholesome herbs and roots help Nature build up more physical resistance and keep up your spirits, so that it can more easily banish the "blues" and give you a happier day of life.

MILLIONS of women have depended upon this Compound and have passed the word along to friends and neighbors, and to their children.

Why not take Pinkham's Compound and go "smiling thru"?

Mr. Caffeine-Nerves fails to spoil Mary

MANY people can safely drink tea and coffee. Many others—and all children—should never drink them. If you are one of these, try Postum's 30-day test. Buy Postum and drink it instead of tea and coffee for one month. Then, *if you do not feel better*, return the container top to General Foods, Limited, Cobourg, Ontario, and we'll gladly refund full purchase price, plus postage. Postum is delicious, economical, easy to prepare, and contains no caffeine.

WNU SERVICE

CHAPTER I.—Continued

"Wild to pioneer, I was; sick a' Sunday school and sewing samplers, but my folks wouldn't stir. So I just up'n went! Tied up a few things and my Bible in my old plaid shawl and sneaked out after the folks was fast asleep, and walked the seven miles and crawled into one a' the covered wagons and played possum till he was well under way. There was a preacher among 'em, and the day I was fifteen he married me to Hank Dana."

"But—Great-granny—wasn't that why you ran away? Why you went? Weren't you in love with Great-grandfather?"

The ancestress stared and shook her head. "Never laid eyes on him till we was a week or more on the way."

Sally Ann laughed. "And all these years I've been nourished on that tender romance!"

"Guess some a' the grand-girls from the East made that up," the old woman said shrewdly.

"Really? Great-granny, I wonder if you'd give me a cup of tea?"

"Not this time a' day, I wouldn't," the old woman said firmly. "I never held with piecing between meals. But Lynn, he's got a lunch waiting for you upstairs, and I guess likely he's wondering where you are." She stepped quickly to the foot of the narrow, precipitous flight and called up: "Oh, Lynn? Comp'ny coming!"

"Fine!" came an answering masculine hail. "To he, Sally Ann! Send her up—fast!"

The returned traveller laughed aloud, gladly. "I'll see you again, Great-granny, darling. It's been so nice to—"

"Yes. I want to tell you about Sairy Lynn, young Ed's girl. He married a smart woman from Detroit; money and determined. Well, she's a thin, dark, close-mouthed young-one, odder'n Adam's off ox. Minute I clapped eyes on her in the cradle, I knew. 'Well, Adelaide, you got 'one a' the queer ones,' I says, and it made her madder'n a wet hen. But it's true; you'll see. Say, maybe you'll take her off with you when you go? She'd admire to put out somewheres, Sairy Lynn would."

Sally Ann shook her head. "Mercy, no, Great-granny! I'm the last person—I know nothing about children and, besides, I'm alone and love it! I'm a lone wolf."

"You're one a' the dark ones."

The ancestress regarded her gravely out of her bright, sunken eyes. "We're all lone wolves, us dark ones. Looks like we ought to run together. That young-one ought to get away, Sally Ann!"

Sally Ann laughed. "She will, if she's any good. Didn't I?"

CHAPTER II.

Sally Ann Dana got through the first difficult moments of her meeting with her third cousin by making persistent talk about the nonagenarian.

"But—isn't she priceless? Ninety-six—and so quick and keen and clear! She's like—what?—a crisp, brittle little old autumn leaf blowing along."

"Exactly," he agreed. "And I'm hoping that she may just blow on and away, some day. It should be like that."

"I believe it will be. One can't conceive of helplessness and indignities for her. I'm sure she'll just suddenly—and simply—stop."

She walked to the window and stood looking out, her back to him. "Gasping for your tea?" He rang. She turned toward him and he nodded approval. "You've pasted down the calendar, haven't you, Sally Ann?" He offered her a cigarette.

She shrugged, leaning nearer for a light. "Aunt Helena says I'm skin and bones."

"Nice skin and bones. The grand-girls, as the matriarch calls them, will thirst for your gore; a lot of tea, too, solid flesh at Dansvale. Thanks, Jens. Miss Dana will pour for me. You remember Jens, Sally Ann?"

"Of course! How are you, Jens?" The tall-stooped Swede was very well and hoped she was the same. He arranged the tray with heavy care and went creaking away.

"Oh, this is nice!" the traveller said contentedly. "Did Jens make these sandwiches? Fancy — with those sledge-hammer hands! But—why the third cup?"

"Sarah Lynn. She's very keen to meet you here, rather than at home, or at Aunt Helena's."

Sally Ann's black brows lifted. "Must I muss up my first returning raptures with the Infant Class?"

"This child is rather special. Enough like you to be, in kennel talk, your little sister."

"Ah! The dark one' Great-granny wants me to take abroad? Well, I won't." She took a second sandwich, which. "I haven't the faintest intention of weighing myself with entangling alliances. I'm utterly, comfortably selfish and intend to remain so. That's what keeps me young and spry," she told him cheerfully. "Duty-doing Danas, I observe, wax portly."

The man in the wheel-chair laughed. "Im't it astonishing how the dark legend persists?"

"Absurd, of course."

"Exactly. Though Cousin Adelaide—Sarah Lynn's mother—rose to battle with the foolish fable. She considers it a quaint and annoying tribal superstition. If Sarah Lynn is a square peg—which she does not for a moment concede—she must and shall, notwithstanding, be snugly fitted into her round hole."

"And does she bring it off?"

He shook his head. "Sarah Lynn merely walks through her part, usually scowling. Cousin Adelaide gave her a large and heavy coming-out party, but she didn't emerge. Now I fancy the idea is to get her married as expeditiously as possible and whisked away from the local landscape."

"Married? I thought she was a child."

"Nineteen. Her mother imported a pallid youth named Duncan Van Doren a couple of years ago—son of her dearest friend in her native Detroit, who needed a milder climate, winters, and who match-makes busily but to no avail."

"Ah!" said his third cousin civilly but without enthusiasm. "Lynn you haven't said whether you liked my 'Musical Miles'?"

"Enormously! I wrote you, but the letter evidently passed you at sea. Extraordinarily nice piece of work, Sally Ann. The Salzberg 'Festpiece' chapter was a gem! You're having lopping notices, aren't you?"

"Not bad. Someone's coming." A door had banged below.

"Come up, Sarah Lynn!" the man called.

But thundering steps took the stairs in bounds and a boy of seventeen burst into the room. He was fair and freckled, with a wide mouth and singularly innocent eyes.

"Bill!" Lynn Dana greeted him, surprised. "This is Sarah Lynn's brother, Sally Ann."

"How do you do, Bill? Will you have some tea?"

"Gosh, no," he said, shocked. "No, thanks, Uncle Lynn, I can't sit down. I got to beat it before Sara Lynn gets here, and don't peep to her that I came, will you?" He turned to the woman with a vivid fusion of embarrassment and urgency. "Say, listen, would you take my sister with you when you go travelling again?"

Sally Ann gazed at him. "Afraid I couldn't do that, Bill."

"Gee, she's simply got to beat it, that's all! she can't stick around here much longer."

"But—why?"

He looked nervously out of the window. "Well—I can't make you understand, I guess, because I got to make it snappy, but she's different from most of the dumb eggs around here and my mother can't see it, and she makes her do all the things they do, and there's a dumb egg here from Detroit that my mother's always pulling for and Sarah Lynn can't see him with a spy-glass, but I'm scared stiff she'll just sort of boil over, if you know what I mean, and do something dumb!" He came to a breathless stop, his round blue eyes on her face.

Sally Ann found him singularly appealing. "Oh, I'm sure she won't, with you to look after her, Bill! Great luck for a girl to have a brother on the job."

"Yeah, but look—I'm in high school all day and in bed all night, account I'm in training, and she has to do all these dumb things, and she's absolutely cuckoo about my mother and she wants to please her—and when my mother's sore at something, why Sarah Lynn just pretty near dies, so it's got me down, kind of, worrying, and—" he looked out again. "Gee! I gotta take it on the lam! Here she comes! Well, look—you kind of think it over, will you? Uncle Lynn, you tell her!" He plunged for the room and they heard him leaping down the stairs.

"Rather a dear, that lad!" Sally Ann said. She set her cup down and walked to the window to see a girl and a groom coming up the road at a smooth and lively speed. "She's wearing exactly the right dog for her type, isn't she?"

"It's a thing to watch—Sarah Lynn and Lightning skimming over the fields," said the man who had sat in a chair for more than 20 years.

(To Be Continued)

Real Community Spirit

Nova Scotia Town Provides Money For Boy's Operation

In an action probably unparalleled in the minutes of Canadian civic bodies, finance committee of the Glace Bay town council voted a loan of $100 to a coal miner to enable him to send his 13-year-old son to Montreal for a delicate brain operation.

The boy, Harold James, son of Mr. and Mrs. Gordon James, injured his head in a fall on the ice 13 months ago. Dr. J. A. Calder, who examined him while in hospital at Glace Bay, N.S., got in touch with a Montreal neurologist, who agreed to perform the operation without cost to the family.

The finance committee's action removed the last barrier—the matter of financing the railroad fare to Montreal and return for Harold and his mother.

A bed in the Royal Victoria Hospital awaited the boy.

Made Bargain With Doctor

Sir Samuel Brighouse has just completed 25 years as coroner for Southport, Lancashire. If he lives until Aug. 1—and happily he has every expectation of doing so—he will have to carry out a bargain he made some years ago with his doctor, it is reported. The bargain was that if the doctor kept him alive until he was 90 Sir Samuel would pay him a sum of money and stand him a good dinner. The anniversary falls on Aug. 1.

A good way to make a postage stamp stick, we read, is to breathe on it instead of licking it. An even better way perhaps is to put the wrong address on the envelope, says Punch.

Ponce de Leon discovered Florida on March 27, 1513. 2295

The Music Of Language

Speech Is An Art And Should Be Cultivated

Innumerable books have been written about songs and singing, yet there seems to be very little in the way of instruction on the universal faculty of speaking. Most people regard voice and speech as an automatic act like eating or drinking or sleeping, yet there are countless men —and women, too— who are spoken of as "having a voice like a crow," or who are unpolished in their language.

A little book written by J. Campbell-McInnes, who is an authority on language and music, ought to be widely studied by those who feel that their voice or speech are lacking in that "culture" which is so attractive in social or public life. As Mr. Campbell-Innes points out, a parrot may "talk", but it cannot think; a dog can bark, but it cannot speak. Only mankind has the gift of speech that raises him above the level of the brute creation. Speech is really an art, no matter how natural it is, and the man or woman with a pleasing speaking voice commands attention in an assembly, besides being highly desirable in itself. Mr. Campebll-Innes' book, called "The Music of Language", may not convert crows into larks, but it is so enlightening and so encouraging in its message and analysis that anybody who reads it is bound to want to improve and to accordingly improvg if he or she follows the advice.

Care At Right Time

Proper Attention Should Be Given To Feet Of Young Horse

"No feet; no horse" is a well known adage amongst horsemen. This statement, states W. H. Hicks, superintendent, Dominion Experimental Farm, Agassiz, B.C., is particularly important and true of stallions, as they are the progenitors of the next horse crop. Inferior feet in horses will be passed on to the next generation just as promptly as any othr structural defect. We can assist heredity, however, by taking proper care of the feet of our horses. It is never too soon to start caring for the young horse's feet. Not only can the feet be improved by reasonable attention, but early, careful, kind handling of foals, will save much perspiration and many backaches later on.

The proper care of horses' feet should keep the foot short in front, wide at the heel and above all else, level on the bottom. This makes a round level foot that takes a good grip of the ground and keeps the pasterns well lined up and at the proper angle.

It is wonderful what can be done in improving action, and in putting knees, hocks and ankles in the correct position by the proper care of young horses' feet at the right time. —Experimental Farms News.

Curb On Spending

German travellers on pleasure cruises will in future be allowed to spend only five marks—about $2 at each foreign port. If the ship calls at two or more ports on the same day a total of five marks must suffice. The maximum money spent on a pleasure cruise must not exceed 50 marks—about $20.

In Central America, there are beetles so large that they can break the windshield of a car travelling at high speed.

Indian summer is not connected with any particular month, but may occur all the way from September to December.

Ancient ruins in Mexico, on being excavated, have yielded meteorites carefully wrapped in mummy cloth.

When you see the effect of money on some folks you realize why Providence keeps most of us poor.

Survey Is Interesting

Designed To Help Farmers Adjust Production To Prospective Demand

While export markets are as constricted as they are to-day, says the Kingston Whig-Standard, a major problem of the Canadian farmer is planning the production of his own farm to take the greatest possible advantage of the markets available. Experts of the Dominion Department of Agriculture have just completed a survey which many farmers might, with profit, tack up on the barn door and refer to frequently throughout the year. It is designed to help them adjust production and marketing to prospective demand.

In general, the experts prophesy that larger supplies of wheat and other farm products will probably result, under the stimulation of the new trade agreements, in larger agricultural exports in 1939. Prices of farm produce generally may improve somewhat as business conditions continue an upward trend. Price levels of 1937 cannot be expected, however.

There is now more feed grain in the country per animal to be fed than at any time during the past eight years. This is not merely because more grain was grown last season; the livestock population itself is the lowest in eight years. The experts, moreover saw little prospect of important increases in livestock population before the latter part of 1939. The number of cattle in Canada, which has been very low for the past three years, will continue to decrease throughout the year. Sheep and horses will remain about the same numerically. The hog population will show some increase during the first six months of the year, a further increase in the following quarter, and a substantial increase in the last three months.

On the question of grain production, the experts were naturally unable to predict with any great degree of assurance. They foresee the possibility of wheat acreage reduction, especially in the United States, but they admit that the important factor in 1939 grain production will be the average yield per acre—and that is a matter that will depend mainly on the weather.

Would Aid Refugees

Campaign For Funds To Help Scientists And Scholars

A campaign for funds to help scientists and scholars driven from their own countries has been opened in London by the Society for the Protection of Science and Learning, which already has found positions in Canada for six academic refugees. Sir Samuel Hoare, Home Secretary, told a campaign meeting the brains of foreign immigrants had enriched Great Britain's national life industrially, commercially and scientifically. Aid to refugee scholars would help make Britain the "intellectual centre of the world."

Very Few Are Bandits

Large Number Of Chinese Guerrillas Are Loyal Farmers

Much is heard from time to time about Chinese guerrillas and how they harass the Japanese armies. Only a small percentage are bandits and even the latter are loyal to China. The fact is that a very large percentage of the guerrillas are Chinese farmers determined to do all they can to save their country from being conquered by the Japanese. They are a sort of militia, and they are both brave and clever. They are largely officered by young Chinese, many of whom were educated in America.

It cost approximately $25,000 to kill each soldier during the World War. The direct cost of the war was $200,000,000; the killed totalled 8,000,000.

Funny there's never a royal commission on government spending.

HEALTHY CHILDREN are Happy CHILDREN

CHILDREN of all ages thrive on "CROWN BRAND" CORN SYRUP. They never tire of its delicious flavor and it really is so good for them—so give the children "CROWN BRAND" every day.

Leading physicians pronounce "CROWN BRAND" CORN SYRUP a most satisfactory carbohydrate to use as a milk modifier in the feeding of tiny infants and as an energy producing food for growing children.

Heartburn, Gas?

If you are troubled with gassy, sour, acid stomach or heartburn, you want to improve your digestion. A tonic that tends to strengthen as in Dr. Pierce's Golden Medical Discovery. Mrs. Gordon Wells, 179 King St. E., Hamilton, Ont., says: "I used to feel sluggish, my stomach troubled me, I belched gas frequently, and then seemed to be such a heavy lumpy feeling in the pit of my stomach. After I had used Dr. Pierce's Golden Medical Discovery, the stomach complaint entirely disappeared and I felt like a new person. I have felt fine ever since." Get it in liquid or tablets from your druggist today.

Murcular Rheumatic Pains—aches

It takes more than "just a salve" to bring relief. It takes a *"counter-irritant"* like good old Musterole—soothing, warming, penetrating and helpful in quickly overcoming the local congestion and pain when rubbed on the aching spots.

Muscular lumbago, soreness and stiffness generally yield promptly.

Better than the old-fashioned mustard plaster, Musterole has been used by millions for 30 years. Recommended by many doctors and nurses.

Made in Canada, in three strengths: Regular, Children's (mild), and Extra Strong. All druggists, 40¢ each.

Canada's Greatest Co-operative

TODAY, thousands of farmers throughout Canada are associated in one great co-operative enterprise to guarantee financial security for themselves and their families.
This organization — non-political and non-partisan — is Life Insurance. For years, it has protected farm homes in every section of our Dominion.
Through Life Insurance savings, every farmer can provide funds for his retirement. He knows that Life Insurance—through good years and lean years—fulfils every guarantee 100 cents on the dollar.
